# Presentation for Business Update

OCTOBER 31, 2024

## Forward-Looking Statements

This communication contains certain forward-looking statements within the meaning of the federal securities laws of the United States. The Company intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 and includes this statement for purposes of complying with these safe harbor provisions. Any statements made in this communication that are not statements of historical fact, such as, statements about our beliefs and expectations regarding our future results of operations and financial position, planned business model and strategy, timing and likelihood of success, capacity, functionality and timing of operation of data centers, expectations regarding the operations of data centers, potential strategic initiatives, such as joint ventures and partnerships, and management plans and objectives, are forward-looking statements and should be evaluated as such. These forward-looking statements generally are identified by the words “may,” “will,” “should,” “expects,” “plans,” “anticipates,” “could,” “seeks,” “intends,” “targets,” “projects,” “contemplates,” “believes,” “estimates,” “strategy,” “future,” “forecasts,” “opportunity,” “predicts,” “potential,” “would,” “will likely result,” “continue,” and similar expressions (including the negative versions of such words or expressions).

These forward-looking statements are based upon estimates and assumptions that, while considered reasonable by Cipher and our management, are inherently uncertain. Such forward-looking statements are subject to risks, uncertainties, and other factors that could cause actual results to differ materially from those expressed or implied by such forward looking statements. New risks and uncertainties may emerge from time to time, and it is not possible to predict all risks and uncertainties. Many factors could cause actual future events to differ materially from the forward-looking statements in this communication, including but not limited to: volatility in the price of Cipher’s securities due to a variety of factors, including changes in the competitive and regulated industry in which Cipher operates, Cipher’s evolving business model and strategy and efforts we may make to modify aspects of our business model or engage in various strategic initiatives, variations in performance across competitors, changes in laws and regulations affecting Cipher’s business, and the ability to implement business plans, forecasts, and other expectations and to identify and realize additional opportunities. The foregoing list of factors is not exhaustive. You should carefully consider the foregoing factors and the other risks and uncertainties described in the “Risk Factors” section of our Annual Report on Form 10-K for the fiscal year ended December 31, 2023 filed with the Securities and Exchange Commission (“SEC”), as any such factors may be updated from time to time in the Company’s other filings with the SEC, including without limitation, the Company’s Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2024. These filings identify and address other important risks and uncertainties that could cause actual events and results to differ materially from those contained in the forward-looking statements. Forward-looking statements speak only as of the date they are made. Readers are cautioned not to put undue reliance on forward-looking statements, and Cipher assumes no obligation and, except as required by law, does not intend to update or revise these forward-looking statements, whether as a result of new information, future events, or otherwise.

## Non-GAAP Financial Measures

This communication includes supplemental financial measures, including Adjusted Earnings (Loss) and Adjusted Earnings (Loss) per share – diluted, in each case, which exclude the impact of (i) the non-cash change in fair value of derivative asset, (ii) share-based compensation expense, (iii) depreciation and amortization, (iv) deferred income tax expense, (v) nonrecurring gains and losses and (vi) the non-cash change in fair value of warrant liability. These supplemental financial measures are not a measurement of financial performance under accounting principles generally accepted in the United States (“GAAP”) and, as a result, these supplemental financial measures may not be comparable to similarly titled measures of other companies. Management uses these non-GAAP financial measures internally to help understand, manage, and evaluate our business performance and to help make operating decisions. We believe the use of these non-GAAP financial measures can also facilitate comparison of our operating results to those of our competitors.

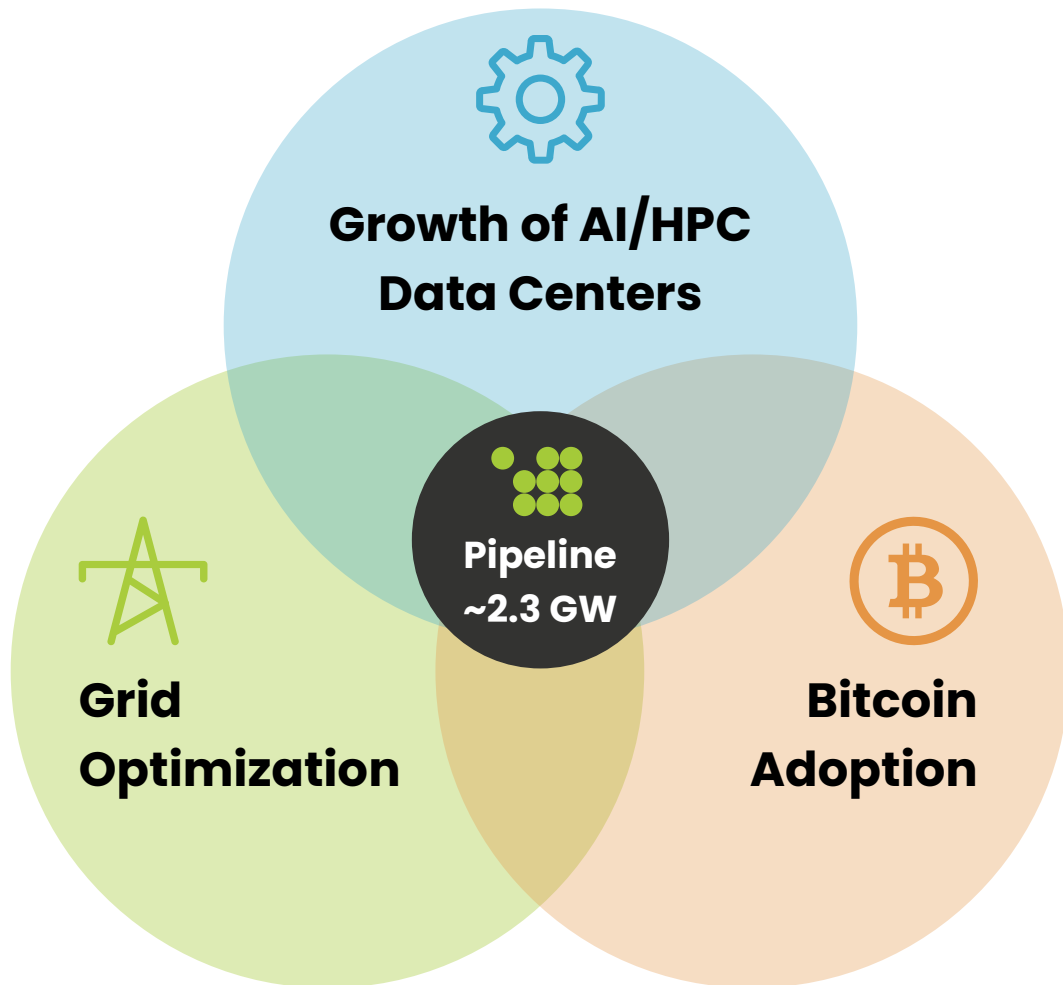

Non-GAAP financial measures are subject to material limitations as they are not in accordance with, or a substitute for, measurements prepared in accordance with GAAP. For example, we expect that share-based compensation expense, which is excluded from the non-GAAP financial measures, will continue to be a significant recurring expense over the coming years and is an important part of the compensation provided to certain employees, officers and directors. Similarly, we expect that depreciation and amortization will continue to be an expense over the term of the useful life of the related assets. Our non-GAAP financial measures are not meant to be considered in isolation and should be read only in conjunction with our financial statements prepared in accordance with GAAP. We rely primarily on such financial statements to understand, manage and evaluate our business performance and use the non-GAAP financial measures only supplementally.

# Cipher Mining

 A DATA CENTER DEVELOPER WITH A BUILT-IN OFFTAKE

- Demonstrated expertise at sourcing greenfield opportunities for data center development
- Focus on low energy prices and ability to monetize curtailment for optimal mining unit economics
- Data center construction and operations team with deep experience from Google, Vantage, Meta, etc.
- Clean balance sheet ready to optimize financing large HPC buildouts

# Key Indicators as of September 30, 2024

## SELF-MINING HASHRATE

**~9.3 EH/s**

September 30, 2024

**~13.5 EH/s @ ~18.9 J/TH**

YE 2024E<sup>(1)</sup>

**~1,508 BTC**

BTC Held

## SITE PIPELINE CAPACITY

**~327 MW**

Current Capacity<sup>(2)</sup>

**~2.3 GW**

Future Pipeline Capacity at 6 New Sites<sup>(3)</sup>

**~2.7c**

Weighted Average  
Power Price  
(c/kwh)<sup>(4)</sup>

Note: Values represented are approximations

(1) Assumes energization of contracted Bitmain S21 Pro and Canaan A1566 rig orders replacing worst performing machines

(2) Includes JV capacity

(3) Includes Black Pearl, Barber Lake, Reveille, Mikeska, Milsing, and McLennan and assumes all load studies / regulatory approvals are passed to reach full potential capacity

(4) Represents the expected weighted average power price at CIPHER's current sites

# Current Portfolio

# Overview

## YTD Operations Update

~\$18,162 All-in Electricity Cost per BTC YTD 2024<sup>(1)</sup>

### Odessa

~\$17,561 all-in electricity cost per BTC YTD 2024<sup>(2)</sup>

~83% of September 2024 BTC production

### Cipher JV Data Centers

Alborz, Bear & Chief

~\$22,928 all-in electricity cost per BTC YTD 2024<sup>(3)</sup>

~17% of September 2024 BTC production

## Steady Scaling

Power Capacity<sup>(4)</sup>

(1) Reflects all-in electricity cost YTD through September 2024; reconciled to dates of latest power bills received  
(2) Reflects electricity cost YTD through September 2024, including TDU charges and net of revenue generated from opportunistic power sales  
(3) Reflects combined electricity cost YTD through September 2024, including taxes, customer charges, 2021 storm surcharge, settlement charges, and TSDP charges; reconciled to dates of latest power bills received  
(4) Shaded area includes full capacity at JV sites

# Operational Highlights

## Odessa – 83% of BTC Production<sup>(1)</sup>

**~7.1 EH/s**

Current Operating Hashrate

**~11.3 EH/s**

YE 2024 Operating Hashrate<sup>(2)</sup>

**~\$25,488**

All-in Electricity Cost per BTC **Post-Halving<sup>(3)</sup>**

**~207 MW**

Total Power Capacity

**~1,872 BTC**

BTC Mined YTD<sup>(4)</sup>

(1) Reflects approximate percentage of Cipher's September 2024 BTC production  
(2) Assumes energization of contracted Bitmain S21 Pro and Canaan A1566 rig orders replacing worst performing machines  
(3) Reflects reconciled electricity cost from April 20, 2024, through September 2024, including TDU charges and net of revenue generated from opportunistic power sales; reconciled to dates of latest power bills received  
(4) YTD through September 2024

# Operational Highlights

Alborz, Bear & Chief – 17% of BTC Production<sup>(1)</sup>

**~4.4 EH/s**

Current Operating Hashrate<sup>(2)</sup>

**120 MW**

Total Power Capacity

**~\$34,160**

All-in Electricity Cost per BTC **Post-Halving**<sup>(3)</sup>

**~488 BTC**

BTC Mined YTD<sup>(4)</sup>

(1) Reflects approximate percentage of Cipher's September 2024 BTC production  
(2) Joint venture with WindHQ LLC, of which Cipher owns ~2.2 EH/s  
(3) Reflects reconciled combined electricity cost from April 20, 2024, through September 2024, including taxes, settlement charges, TSDP charges, customer charges, and 2021 storm surcharge; reconciled to dates of latest power bills received  
(4) YTD through September 2024; joint venture with WindHQ LLC, of which Cipher owns ~239 BTC

# Development Pipeline

# Growth: Black Pearl

## Black Pearl

**300 MW**

Total Power  
Capacity

**70 Acres**

Total  
Acreage

- Energization expected in 2Q 2025
- Data center construction underway
  - Steel erection, concrete foundations, and underground electrical progressing on schedule
- BTC mining design envisions 250 MW of air-cooled and 50 MW of liquid-cooled mining operations that can provide ~21.5 EH/s<sup>(1)</sup>

<sup>1)</sup> Assumes a PUE of ~1.06 and an efficiency of ~13.2 J/TH/s per rig for full 300 MW BTC mining build out at Black Pearl site

# Growth: Barber Lake

## Barber Lake

**300 MW**

Approved  
Power Capacity

**250 Acres**

Total  
Acreage

- Site is energized and ready for construction
- Site features:
  - 250 acres of owned land in West Texas
  - Newly constructed high-to-mid voltage substation
  - Approvals for 300 MW of interconnection / agreements necessary to participate in the ERCOT market

# Growth: Reveille

## Reveille

**70 MW**

Initial Approved  
Power Capacity

**200 MW**

Total Potential  
Power Capacity

- Site features 70 MW available in Q4 2027, with potential to expand the capacity to 200 MW - subject to regulatory approvals
- Located in LZ\_South, which diversifies exposure within ERCOT as other current sites are in LZ\_West

# Growth: Mikeska

## Mikeska

**500 MW**

Total Potential  
Power Capacity

**100 Acres**

Total  
Acreage

- Option to purchase new site based on number of megawatts approved for interconnection
- Site features:
  - 100 acres of land with exclusive option to own
  - Located in LZ\_West
  - Total capacity of 500 MW pending load studies / ERCOT LFL approval
  - Expected to energize Q4 2027

# Growth: Milsing

## Milsing

### 500 MW

Total Potential  
Power Capacity

### 187 Acres

Total  
Acreage

- Option to purchase new site based on number of megawatts approved for interconnection
- Site features:
  - 187 acres of land with exclusive option to own
  - Located in LZ\_North, which diversifies exposure within ERCOT as other current sites are in LZ\_West
  - Total capacity of 500 MW pending load studies / ERCOT LFL approval
  - Expected to energize Q4 2027

# Growth: McLennan

## McLennan

**500 MW**

Total Potential  
Power Capacity

**293 Acres**

Total  
Acreage

- Option to purchase new site based on number of megawatts approved for interconnection
- Site features:
  - 293 acres of land with exclusive option to own
  - Located in LZ\_North, which diversifies exposure within ERCOT as other current sites are in LZ\_West
  - Total capacity of 500 MW pending load studies / ERCOT LFL approval
  - Expected to energize Q4 2027

# HPC Infrastructure – Speed to Market

## Current Market Conditions

- Scarcity of Powered Capacity
- Scarcity of Large Suitable Sites
- Urgency of Time to Market

## Cipher Advantages

- Readily Available Large Suitable Sites
- Energization Timeliness Unlocks Massive Value for End Users
- Ability to Focus on Highest Quality Tenants

"Prices charged by colocation providers for available data center capacity in the United States...**rose by an average of 35 percent** between 2020 and 2023. Additionally, new capacity due to come online in the next two to three years has already been leased out."

- McKinsey & Company  
"AI Power: Expanding Data Center Capacity to Meet Growing Demand" Report on 10/29/2024

"I'd rather risk building capacity before it is needed, rather than too late, **given the long lead times for spinning up new infra projects.**"

- Mark Zuckerberg, CEO  
Meta Platforms, Inc. Q2-2024 Earnings Call on 07/31/2024

"Every dollar a cloud provider spends on buying a GPU, they're going to make it back at **\$5 over 4 years**...Here [AI inference], the economics are even better. So, every **\$1 spent, there's \$7 earned** over that same time period and growing."

- Ian Buck, VP of Accelerated Computing  
NVIDIA Corp. Presentation at BofA Securities 2024 Global Technology Conference on 06/05/2024
